

Things not to do this while learning DSA

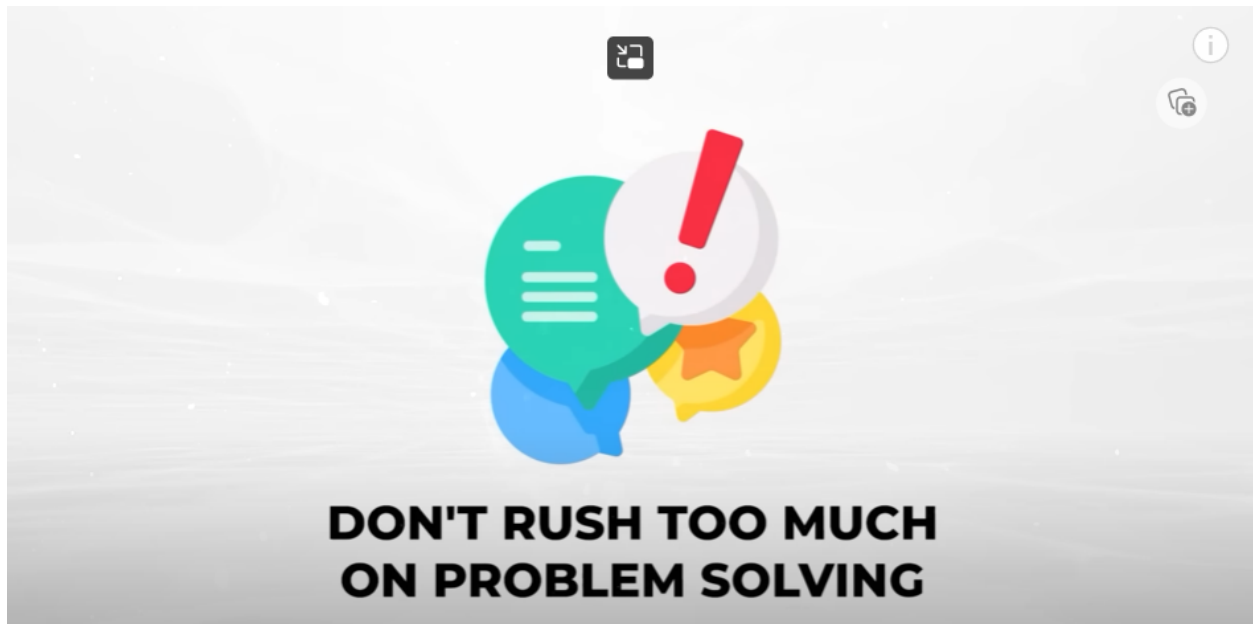

1. Don't stick to a particular DSA
solve average 20-25 problems in every DSA
always keep going forward , because you'll
get revised previous topic automatically while learning another DSA

2. Don't Rush too much on problem solving

You have to solve 200-250 problems in total. But You have to do them with quality. Give time .No hurry!

3. Use pen and paper.

Implement same things with different DSA!

4. Revise is Important ..Always revise a DSA topic 20-30 days later after learning it

Revise>

Always revise a DSA topic 20-25 days after learning

5. See the solutions of other people. You'll get to know new methods, implement style etc.

see others code

See code of others from different platform

5. Don't leave DSA after learning

suppose you're learning web or app development now, so don't just leave DSA. you'll have to start again.

6. Contest

Give contest to practice DSA all the time
